Advising

Dr. Scheer advises annually about 20 undergraduate students. He also advises many M.S. and Ph.D. students.

Dr. Scheer serves on behalf of The Ohio State University graduate school as a graduate faculty representative for doctoral dissertation exams.

Teaching Philosophy

Dr. Scheer's approach to teaching is a flexible mixture of learning and teaching formats. He employs a variety of teaching techniques to promote active learning (i.e., student involvement through discussion, reading, and writing) by engaging students through a variety of activities, such as debates, role play, group work, multimedia, panel discussions, and symposia to name a few. The education literature describes this practice as an active learning approach.

Dr. Scheer's teaching approach is:

- 1) to have students involved in more than just listening,
- 2) to place less emphasis on giving information and more on developing student skills,
- 3) to involve them in higher-order thinking (analytically, critically, and relationally),
- 4) to have students explore their own attitudes and values and how that affects their learning.
